Backend software engineer with 7+ years building scalable, high-traffic systems, currently at MercadoLibre serving over 1M customers. Specialized in Go and Java microservices, event-driven architecture with Kafka, and cloud infrastructure on Azure and GCP. I own the reliability layer as well as the feature layer, having built end-to-end observability pipelines with OpenTelemetry across New Relic, Grafana, Datadog, and Kibana. Co-founder of FINK AI, a personal-finance product, since 2025.

Core Competencies

- **Languages:** Go (primary), Java, Python, SQL, JavaScript, C.
- **Backend & Architecture:** Microservices, REST APIs, event-driven systems, concurrency with goroutines, in-memory caching, MVC.
- **Messaging & Streaming:** Apache Kafka, Confluent Cloud, Avro and Schema Registry.
- **Cloud & DevOps:** Azure (AKS, Functions), Google Cloud Platform, Terraform, Kubernetes, Docker, Jenkins, CI/CD, Linux.
- **Observability:** OpenTelemetry, New Relic, Grafana, Datadog, Kibana, custom instrumentation.
- **Data & Frameworks:** PostgreSQL, Redis, Spring, Spring Boot, JUnit, Git.

Professional Experience

- **MercadoLibre** **Remote**
Software Engineer (Go) *2022–Present*
 - Design, develop, and deploy scalable backend services for e-commerce platforms serving 1M+ customers, applying modern engineering practices across the full delivery lifecycle.
 - Built end-to-end observability and quality-assurance pipelines with OpenTelemetry, integrating New Relic, Grafana, Datadog, and Kibana, and authored custom instrumentation to minimize external dependencies.
 - Used Go goroutines for concurrent I/O-bound processing and implemented an in-memory caching layer that measurably accelerated data retrieval and improved service throughput.
- **FINK AI** **São Paulo, Brazil**
Co-Founder *2025–Present*
 - Co-founded a personal-finance product covering balances, transaction categorization, budgeting goals, credit-card bills, investments, and Open Finance account integration.
 - Responsibilities span product direction and backend engineering, alongside full-time employment.
- **ExxonMobil** **Curitiba, Brazil**
Software Engineer (Java) *2021–2022*
 - Developed synchronous Java APIs and Kafka-based integrations, improving data flow across services.
 - Provisioned and managed Azure infrastructure with Terraform, orchestrating containerized services and configuring Confluent Cloud Kafka with an Avro schema registry to compress payloads and optimize throughput.
 - Received a Leadership Recognition Award (2022) for driving the MSP transition program across planning, execution, and cross-team coordination with an external vendor.
- **Composable Bit** **Remote**
Software Engineer (Java) *2021*
 - Built modular software components tailored to dynamic system requirements.
 - Orchestrated Azure microservices using Azure Kubernetes Service for containerized workloads and Azure Functions for event-driven serverless tasks.

- **Go44** **Remote**
Software Engineer, Part-time (Ruby) *2020–2021*
 - Maintained core systems and developed a new module for the company's flagship product to support Industry 4.0 initiatives.
- **SaaS Tec Labs** **Curitiba, Brazil**
Software Engineer, Intern to Part-time (PHP) *2020–2021*
 - Developed and maintained the company's PHP e-commerce platform, improving backend processes and the end-user experience.
- **Banco do Brasil** **Curitiba, Brazil**
Software Engineer Intern (Java) *2019–2020*
 - Built internal applications using the MVC pattern with Java, JavaScript, and SQL.

Projects

- **Financial Bot** *2021*
Go, PostgreSQL, Redis
 Personal finance management application to track income and expenses, manage investments, set financial goals, and send reminders. Go backend, PostgreSQL for persistence, Redis for caching and performance.

Education

- **USP / ESALQ** **Online, Brazil**
MBA, Data Science & Analytics *2022–2024*
 Statistics, data science, and analytics applied to business decision-making.
- **Pontifícia Universidade Católica do Paraná** **Curitiba, Brazil**
BSc, Computer Science *2018–2021*
 Computer science fundamentals, algorithms, and software engineering.
- **Instituto Federal do Paraná** **Curitiba, Brazil**
Technical High School, Digital Games Programming *2015–2017*
 Programming fundamentals and games development.

Languages

- Portuguese (native), English (full professional), Spanish (professional working).

Certifications

- Fundamentos de IA; Algoritmos Supervisionados; Java; Git; HTTP.

Honors and Awards

- **Leadership Recognition Award** – ExxonMobil (2022). For driving the MSP transition program end to end.
- **Recognition Award, CSSP Project** – ExxonMobil.
- **Recognition Award, CSIT** – ExxonMobil.
